Objective

Results-driven Computer Science Engineering student strongly passionate for AI-driven product development and software development. Strong foundation in machine learning, database management, data preprocessing and a leader as well as a collaborative strategic team player.

Education

United College of Engineering & Research — **2023 – Present**
Bachelor of Technology, Computer Science and Engineering — **GPA: 7.83/10**

Class 12th (CBSE) — **2022 – 23**
Springer Public School Prayagraj — **67%**

Class 10th (CBSE) — **2020 – 21**
Springer Public School Prayagraj — **93%**

Academic Projects

1. **GlowLang: Production-Grade Systems Programming Language & Compiler**
   - Developed a custom programming language in **C**, using **Flex and Bison** for lexing and parsing, with a compiler, virtual machine, and runtime.
   - Achieved **up to 1.58x** faster performance than **CPython 3.12**; implemented memory management, networking, and database support.
   - Designed a custom garbage collector combining tri-color mark-and-sweep, block arena allocation, and NaN-boxing to keep primitives off the heap.
2. **Nyay Mitra: AI-Powered Legal Assistant** **(Ongoing)**
   - Built an AI-powered legal drafting assistant using FastAPI and a multi-stage LLM pipeline with Gemma 26B and Gemma 4B.
   - Automated legal fact extraction, follow-up question generation, and document drafting.
   - Designed the pipeline to detect missing information and ground every draft in citizen-provided facts, preventing hallucinated content and misidentified document types.
3. **ColdCraft: AI-powered Cold Email Generator**
   - Built an AI-powered cold email generator using Node.js, Express, and Groq LLMs.
   - Automated personalized email generation with resume parsing and profile-based prompts.
   - Supported 4 email types and 4 tones across a multi-model Groq pipeline, with saved history and one-click copy.

Certifications and Achievements

1. **Summer Internship – AI & ML**, IIHMF, MNNIT Allahabad — *May – Jun 2026*
2. **IBM FSP Virtual Internship – AI**, IBM Skills Network — *Jan – Mar 2026*
3. **Smart India Hackathon (SIH)** – College-level internal selection; shortlisted out of **120 teams**.
4. **Summer Training – Java Collection Frameworks, UCER** — *Aug 2024*
5. **Databricks Generative AI Fundamentals**, Databricks Academy — *Aug 2025 – Aug 2027*

Skills

1. C++, Python
2. MERN
3. MySQL (Database Management)
4. Machine Learning, Artificial Intelligence, BERT
5. Compiler Design, OOPS
6. Federated Learning
